5S CLEANING STATIONS

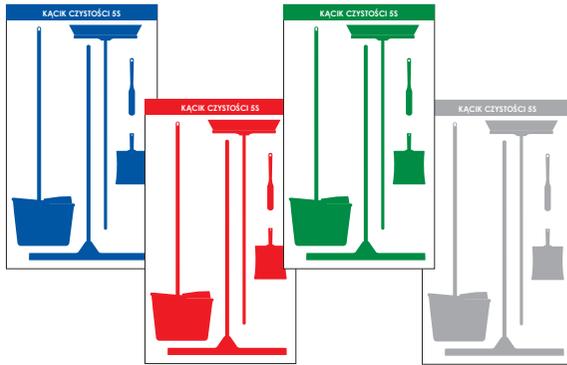

5S CLEANING STATIONS

5S cleaning stations are the most commonly used types of 5S shadow boards. Cleaning stations fulfil a crucial role in almost every 5S programme.

5S cleaning stations are the most commonly used types of 5S shadow boards. Cleaning stations fulfil a crucial role in almost every 5S programme.

Cleaning stations endorse the 5S programme by eliminating the need to search for missing tools, saving us time and frustration. They prevent cross-contamination in food production plants, improve workplace safety and contribute to employee involvement through a structured and organised work environment.

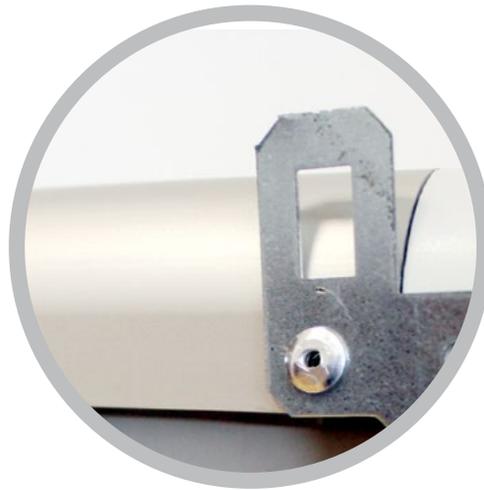

The choice of colours for the shadow boards, or both shadows and tools in the case of some cleaning stations, allows 5S station colour coding.

The aim may be to enable colour-coding of identification zones in production areas or to label sensitive components, equipment, production lines or users.

PRODUCT TYPES

FRAMELESS WALL BOARD

FRAMED WALL BOARD

PROFILES

M1 CLEANING STATION

5S Shadow board – M1 cleaning station with equipment – with dimensions 550 x 1450 mm.
5S cleaning station with equipment, printed equipment shadows and mounting elements.
Digital print on 3 mm composite panel (alu+PE+alu).

M1 shadow board equipment: broom, hand brush, dustpan. The cleaning station comes with equipment hooks and mounting elements.

Standard shadow colours: blue, red, green, grey, other (on request).

EQUIPMENT

Dustpan 0735

Made of galvanised metal. Dimensions (length/width): 315 x 195 mm.

Hand brush 6455

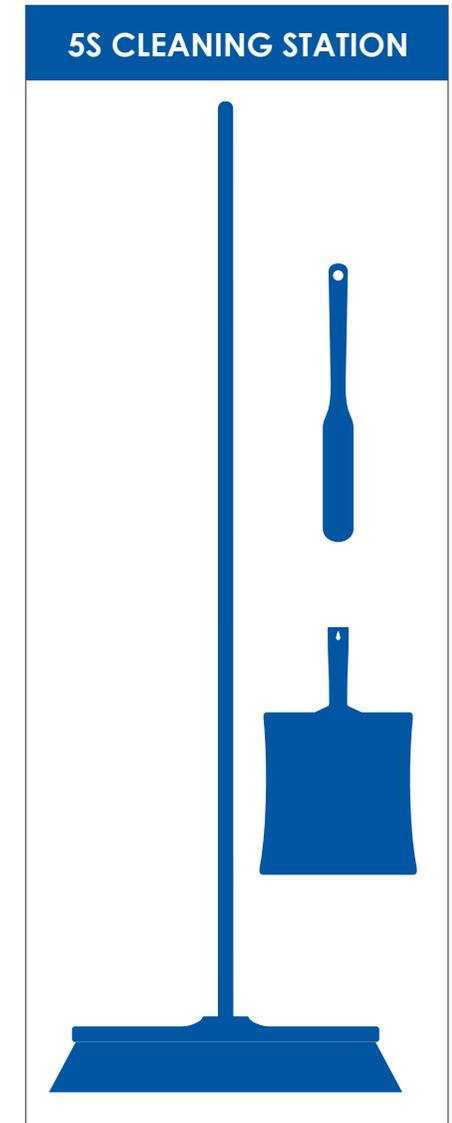

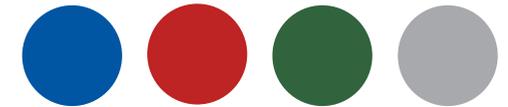

Handle made of varnished beech hardwood. Bristles are made of PET fibre.
Length: 360 mm, bristle height: 65 mm, head width: 42 mm.

Broom with a threaded handle 6522+6557

Broom handle made of beech wood, threaded (Italian type), length: 120 cm, diameter: 22 mm.

The handle is made of varnished beech hardwood, the socket has a 22 mm thread (Italian type).
Bristles are made of crimped PET fibre.

The broom is intended for both indoor and outdoor sweeping.
Bristle height: 65 mm, head width: 47 mm, length: 400 mm.

M2 CLEANING STATION

5S Shadow board – M2 cleaning station with equipment – with dimensions 750 x 1550 mm. 5S cleaning station with equipment, printed equipment shadows and mounting elements. Digital print on 3 mm composite panel (alu+PE+alu).

M2 shadow board equipment: shovel, 600 mm broom, hand brush, dustpan, galvanised bucket (on a shelf).
The cleaning station comes with equipment hooks, a bucket shelf and all mounting elements.

Standard shadow colours: blue, red, green, grey, and other (on request).

EQUIPMENT

Dustpan 0735

Made of galvanised metal. Dimensions (length/width): 315 x 195 mm.

Hand brush 6455

Handle made of varnished beech hardwood. Bristles are made of PET fibre.
Length: 360 mm, bristle height: 65 mm, head width: 42 mm.

Broom with a threaded handle 6531+6559

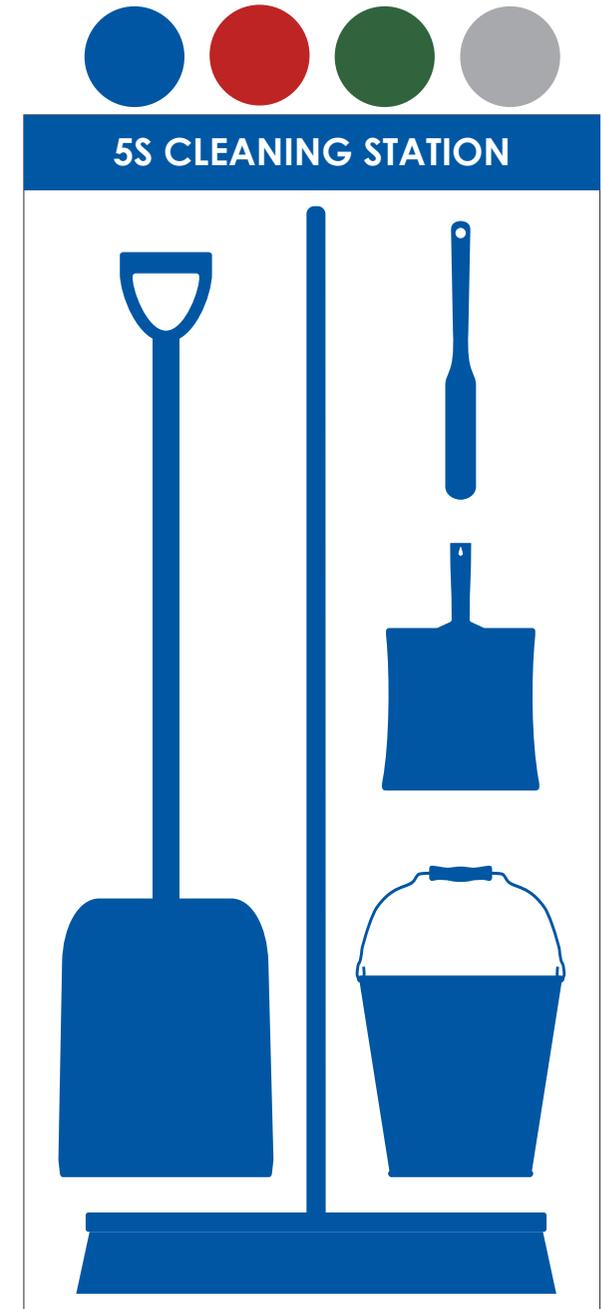

Broom handle made of beech wood with a street sweeping thread. Length: 130 cm, diameter: 28 mm.
The broom handle and head is made of beech hardwood. Bristles are made of crimped PET fibre.
The socket's diameter is 22 mm. A broom designed for sweeping streets, pavements, driveways, garages, as well as larger outdoor and indoor areas. Bristle height: 65 mm, head width: 55 mm, length: 600 mm.

Shovel 0954

Made of powder coated high grade steel. The solidly set shaft is made of hardwood, finished with a metal DY handle. Ideal for loading and unloading coal, coke, culm, etc. Dimensions: 28 x 36 x 120 cm.

Galvanised bucket 0902

Made from good quality galvanised steel. It has a flat, low-set bottom. It is resistant to corrosion and mechanical damage. Capacity: 10 l, bottom diameter: 190 mm, top diameter: 270 mm, height: 260 mm.

M3 CLEANING STATION

5S Shadow board – M3 cleaning station with equipment – with dimensions 950 x 1650 mm.
5S cleaning station with equipment, printed equipment shadows and mounting elements.
Digital print on 3 mm composite panel (alu+PE+alu).

M3 shadow board equipment: broom, hand brush, dustpan, mop with bucket, squeegee.
The cleaning station comes with equipment hooks, a bucket shelf and all mounting elements
Standard shadow colours: blue, red, green, grey, and other (on request).

EQUIPMENT

Dustpan 0735

Made of galvanised metal. Dimensions (length/width): 315 x 195 mm.

Hand brush 6455

Handle made of varnished beech hardwood. Bristles are made of PET fibre.
Length: 360 mm, bristle height: 65 mm, head width: 42 mm.

Broom with a threaded handle 6522+6557

Broom handle made of beech wood, threaded (Italian type), length: 120 cm, diameter: 22 mm. The handle is made of varnished beech hardwood, the socket has a 22 mm thread (Italian type).
Bristles are made of crimped PET fibre.
The broom is intended for both indoor and outdoor sweeping.
Bristle height: 65 mm, head width: 47 mm, length: 400 mm.

Water squeegee with a handle 5087+0395.

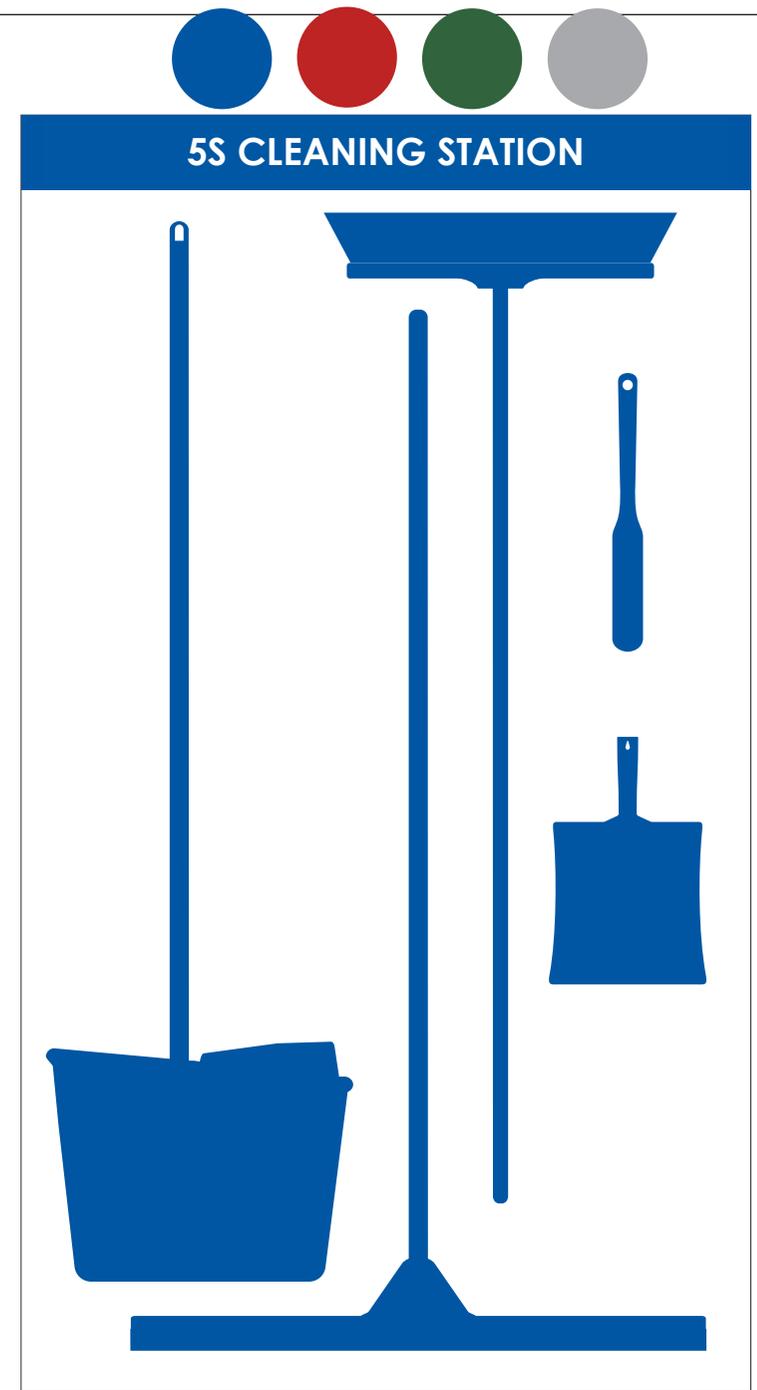

Water squeegee made of galvanised metal with a handle (130 cm, Ø 28 mm) made of beech wood.
Work surface made of high-quality foam with high abrasion resistance. It is used to remove water, mud, or sludge from the floor.
Dimensions: 750 mm.

Mop (skp450-hfk450) with a bucket and wringer haa903.

Cotton string mop with a thread. Perfect for daily maintenance of floors with a small surface area, both for professional and domestic use: for mopping and wiping all types of floors, suitable for wet and damp mopping. Highly absorbent. Designed for repeated use. The mop handle is made of plastic-coated metal and has the length of 120 cm.

A practical and useful bucket. It has a comfortable, non-slip handle for easy and convenient handling. The bucket's compact dimensions ensure convenience of storage and use. Equipped with a wringer for string and strip mops with an integrated handle holder.

A handle at the base of the bucket and a contoured spout make water disposal easy.
The bucket is made from UV- and deformation-resistant plastic. Capacity: 14 litres.

M4 CLEANING STATION

5S Shadow board – M3 cleaning station with equipment – with dimensions 1000 x 1750 mm.
5S cleaning station with equipment, printed equipment shadows and mounting elements.
Digital print on 3 mm composite panel (alu+PE+alu).

M4 shadow board equipment: shovel, 600 mm broom (x2), sand shovel (x2), hand brush, dustpan.

The cleaning station comes with equipment hooks, a bucket shelf and all mounting elements.

Standard shadow colours: blue, red, green, and other (on request).

EQUIPMENT

Dustpan 0735

Made of galvanised metal. Dimensions (length/width): 315 x 195 mm.

Hand brush 6455

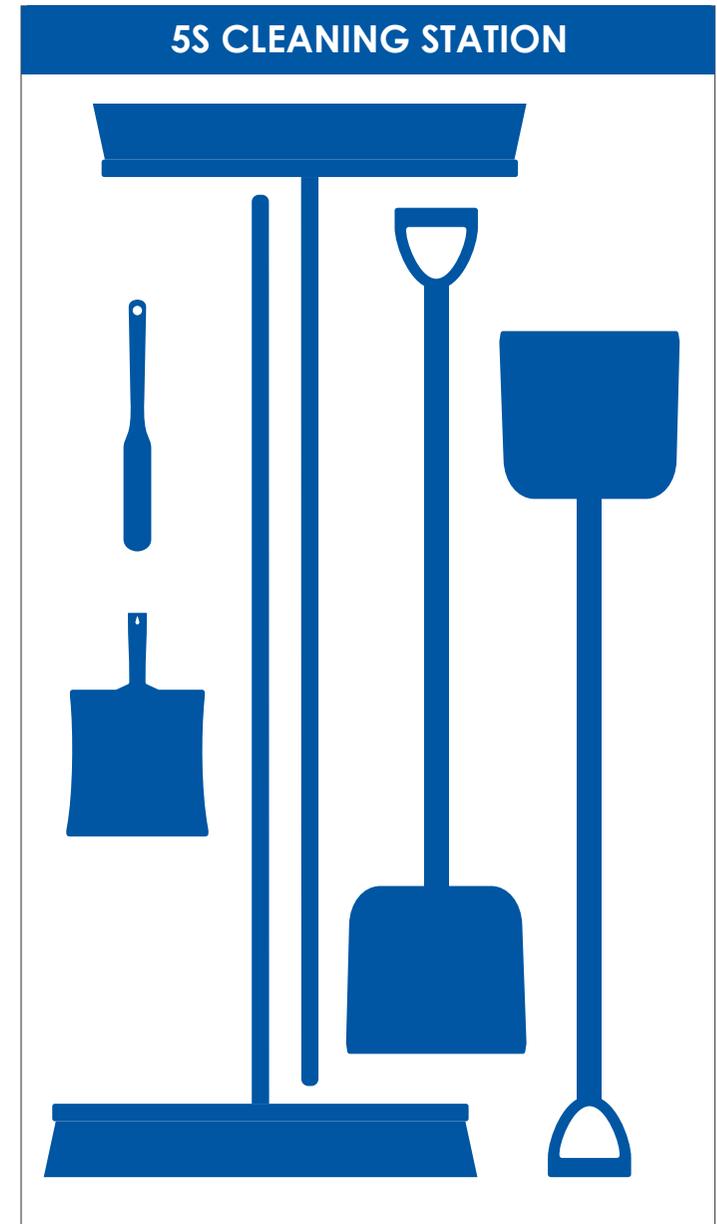

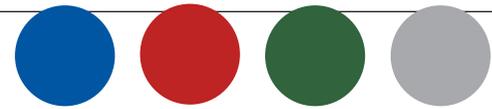

Handle made of varnished beech hardwood. Bristles are made of PET fibre.
Length: 360 mm, bristle height: 65 mm, head width: 42 mm.

2x Broom with a threaded handle 6531+6559

Broom handle made of beech wood with a street sweeping thread. Length: 130 cm, diameter: 28 mm.
The broom handle and head is made of beech hardwood. Bristles are made of crimped PET fibre.
The socket's diameter is 22 mm. A broom designed for sweeping streets, pavements, driveways, garages, as well as larger outdoor and indoor areas. Bristle height: 65 mm, head width: 55 mm, length: 600 mm.

2x Sand shovel 4698

Sand shovel with the blade made of carbon steel and the shaft made of metal encased in plastic. The shovel is perfect for clearing and maintenance work. It is designed for moving sand, earth and gravel.
The shovel is made of high grade hardened steel with a hardness of 45 HRC. The metal shaft is encased in rubber to guarantee a steady grip. It has a profiled, robust handle made of plastic. The ergonomic shape of the shovel makes for comfortable work.
Height: 26 cm Length: 121 cm Width: 24 cm.

V1 CLEANING STATION

5S Shadow board – V1 cleaning station with equipment – with dimensions 550x1550 mm. 5S cleaning station with equipment, printed equipment shadows and mounting elements.
Digital print on 3 mm composite panel (alu+PE+alu).

V1 shadow board equipment: broom, hand brush and dustpan made of polypropylene.

The cleaning station comes with equipment hooks and all mounting elements.

Standard colours of shadows and equipment of the cleaning stations: blue, red, green.

EQUIPMENT

Dustpan 5660x.

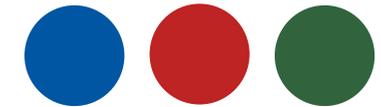

A dustpan with a sharp edge and a very sturdy handle. It can be used on tables or floors. Heat resistance up to 121°C. Made of polypropylene. Dimensions: 100 x 330 x 295 mm.

Hand brush 4587x.

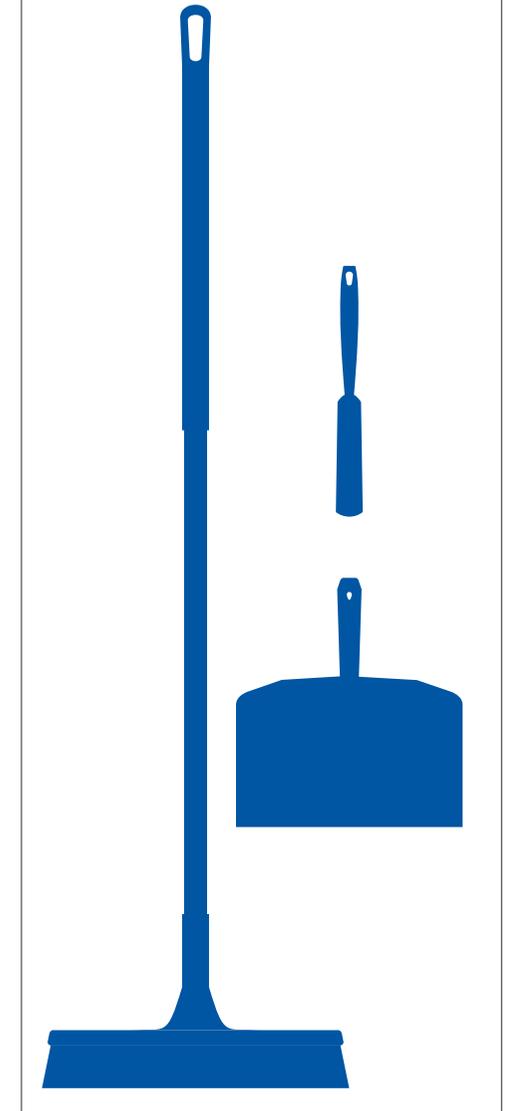

Soft bristle hand brush, ideal for sweeping dry and fine particles, such as flour, icing sugar, dust, etc. It can also be used as a set with the dustpan. Withstands contact with aggressive chemicals. Heat resistance up to 121°C. Made of polypropylene, with polyester bristles. Dimensions: 110 x 330 x 35 mm.

Broom with an extendable handle 2935x + 3174x.

A robust sweeping brush with two types of bristle hardness. The hard front bristles remove firmly attached dirt, while the soft bristles at the back sweep away residue. Withstands contact with aggressive chemicals. Heat resistance up to 121°C. Made of polypropylene, with polyester bristles. Dimensions: 120 x 410 x 90 mm. Universal aluminium handle with a length of 1310 mm. Heat resistance up to 121°C. Made of aluminium and polypropylene. Dimensions: 31 x 1310 x 31 mm, Ø 31 mm.

V2 CLEANING STATION

5S Shadow board – V2 cleaning station with equipment – with dimensions 950 x 1600 mm. 5S cleaning station with equipment, printed equipment shadows and mounting elements. Digital print on 3 mm composite panel (alu+PE+alu).

V2 shadow board equipment: broom, hand brush and dustpan as well as bucket and shovel made of polypropylene. The cleaning station comes with equipment hooks, a bucket shelf and all mounting elements.

Standard colours of shadows and equipment of the cleaning stations: blue, red, green.

EQUIPMENT

Dustpan 5660x.

A dustpan with a sharp edge and a very sturdy handle. It can be used on tables or floors. Heat resistance up to 121°C. Made of polypropylene. Dimensions: 100 x 330 x 295 mm.

Hand brush 4587x.

Hand brush with soft bristles, ideal for sweeping dry, fine particles, such as flour, icing sugar, dust, etc. Can also be used as a set with the dustpan.

Withstands contact with aggressive chemicals. Heat resistance up to 121°C. Made of polypropylene, with polyester bristles. Dimensions: 110 x 330 x 35 mm.

Broom with an extendable handle 2935x + 3174x.

A robust sweeping brush with two types of bristle hardness. The hard front bristles remove firmly attached dirt, while the soft bristles at the back sweep away residue.

Withstands contact with aggressive chemicals.

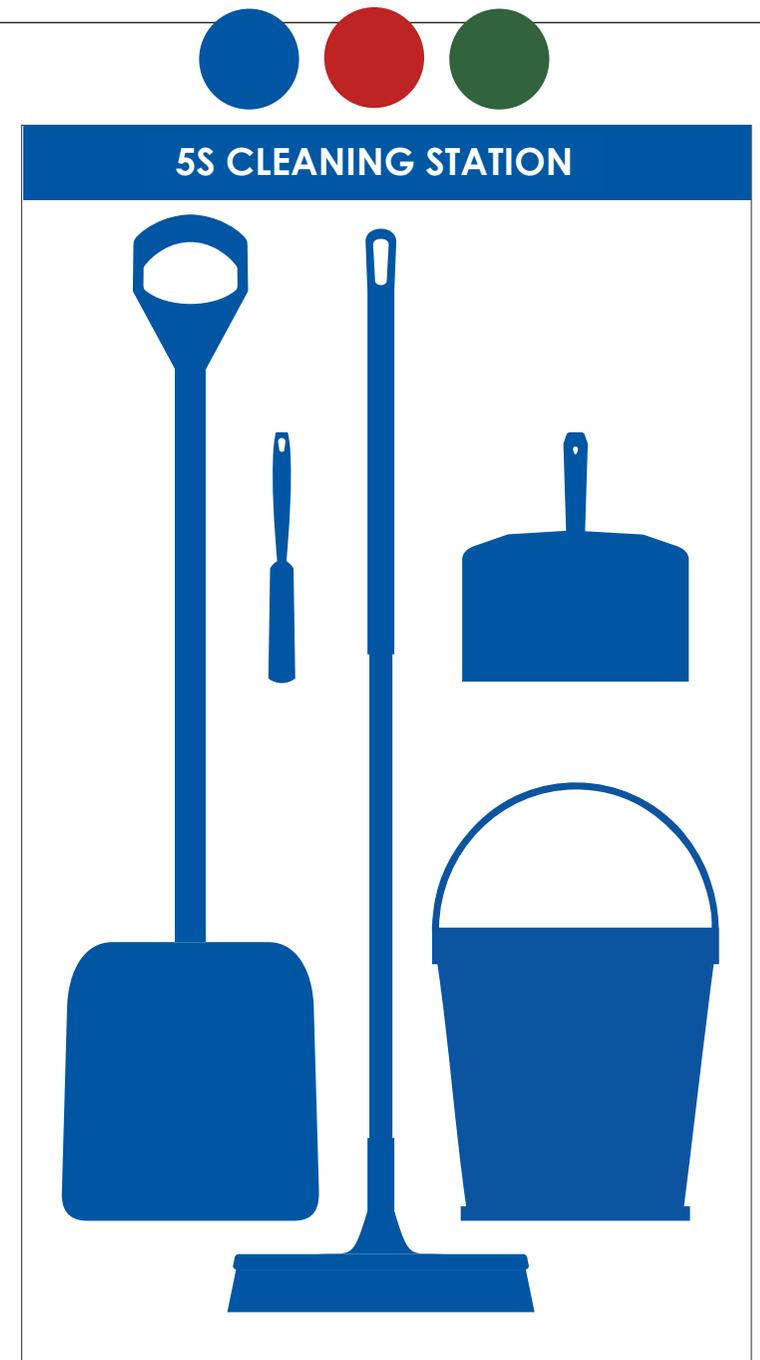

Heat resistance up to 121°C. Made of polypropylene, with polyester bristles.

Dimensions: 120 x 410 x 90 mm.

Universal aluminium handle with a length of 1310 mm. Heat resistance up to 121°C. Made of aluminium and polypropylene. Dimensions: 31 x 1310 x 31 mm, Ø 31 mm.

Bucket 5692x. Capacity 20 litres, made of polypropylene, stainless steel handle. Used for cleaning, as well as for storing equipment and substances, including food substances. The bucket has a large spout, which prevents substances from spilling. The handles near the base make it easy to lift and empty the bucket. Dimensions: 470 x 380 mm. Weight: 1.77 kg.

Shovel 5601x. The handle has an aluminium core secured at both ends for operator safety. It can be used as a large scoop. It is ideal for working on floors and in containers. This product is suitable for contact with food. It can be used as a large scoop. The curved design facilitates work. The shortened design of the small shovel is a good solution for emptying small containers. Sometimes used as a large shovel for residue after sweeping. Material: polypropylene. Dimensions: length: 1310 mm, width: 345 mm, height: 225 mm.

P1 CLEANING STATION

5S shadow board – P1 cleaning station with food-grade equipment – with dimensions 700 x 1750 mm.
5S cleaning station with equipment, printed equipment shadows and mounting elements.
Digital print on 3 mm composite panel (alu+PE+alu).

P1 shadow board equipment: broom, hand brush and dustpan approved for contact with food.
The cleaning station comes with equipment hooks and all mounting elements.

Standard colours of shadows and equipment of the cleaning stations: blue, red, green.

EQUIPMENT

80302-x dustpan with a hand brush holder.

Dustpan with a hand brush holder with dimensions 320 x 290 mm. Made of polypropylene (PP), temperature resistance from -25°C to +120°C.

(PP) Polypropylene – acid- and alkali-resistant plastic (PH 1-14). Approved for contact with food.

The product is available in a range of colours to enable colour coding for identifying zones in production areas or labelling sensitive components, equipment, production lines or users. **IMPORTANT!** The dustpan is sold separately without a hand brush. The hand brush is not part of the set.

Hand brush 10252-x. Dimensions: 340 x 35 mm. Hand brush made of two types of undetectable plastic: body from (PP) polypropylene and bristles from (PBT) polybutylene terephthalate. Temperature resistance from -30°C to +134°C. Approved for contact with food.

The product is available in a range of colours to enable colour coding for identifying zones in production areas or labelling sensitive components, equipment, production lines or users.

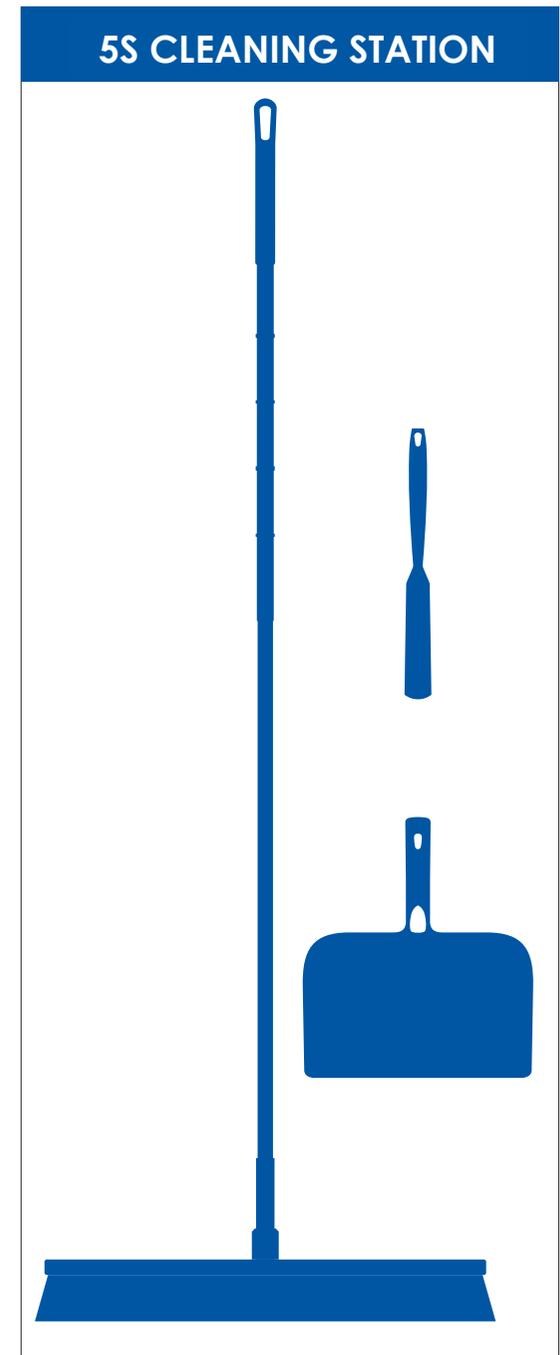

Broom with an aluminium handle 27136-x + 29814-x.

A broom made of two types of undetectable plastic: body from (PP) polypropylene and bristles from (PBT) polybutylene terephthalate.

Dimensions: 600 x 60 mm. Temperature resistance between -30°C and +134°C.

Approved for contact with food. The product is available in a range of colours to allow colour coding for identifying zones in production areas or labelling sensitive ingredients, equipment, production lines or users. The aluminium ergonomic handle is made from two types of material: polypropylene (PP) and aluminium alloy (AlMgMn).

Dimensions: 1500 x 32 mm. Temperature resistance from -25°C to +100°C. Approved for contact with food.

P2 CLEANING STATION

5S shadow board – P2 cleaning station with food-grade equipment – with dimensions 900 x 1850 mm.

5S cleaning station with equipment, printed equipment shadows and mounting elements.
Digital print on 3 mm composite panel (alu+PE+alu).

P2 shadow board equipment: broom, hand brush and dustpan, shovel and squeegee with a double rubber strip all approved for food contact. The cleaning station comes with equipment hooks and all mounting elements.

Standard colours of shadows and equipment of the cleaning stations: blue, red, green.

WYPOSAŻENIE

Wide shovel 80301-x. Width: 30 cm. Made from polypropylene (PP).
Approved for contact with food. Temperature resistance between -25°C and +120°C (PP).

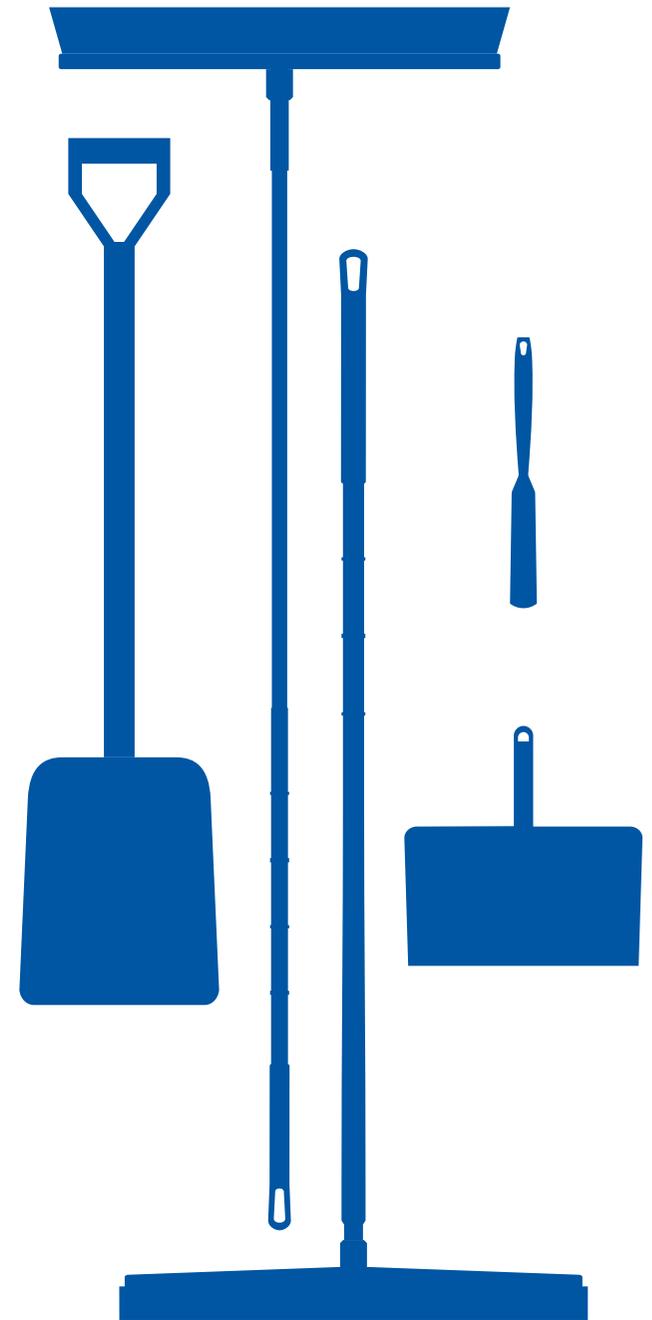

Hand brush 10252-x. Dimensions: 340 x 35 mm Hand brush made of two types of undetectable plastic: body from (PP) polypropylene and bristles from (PBT) polybutylene terephthalate. Temperature resistance from -30°C to +134°C. Approved for contact with food.

Broom with an aluminium handle 27136-x + 29814-x.
The broom is made of two types of undetectable plastic: the body is made of (PP) polypropylene and the bristles from polybutylene terephthalate (PBT). Dimensions: 600 x 60 mm. Temperature resistant from -30°C to +134°C. Approved for contact with food.
The aluminium ergonomic handle is made from two types of material: polypropylene (PP) and aluminium alloy (AlMgMn).
Dimensions: 1500 x 32 mm. Temperature resistance from -25°C to +100°C. Approved for contact with food.

One-piece shovel 14103-x made of polypropylene (PP). Temperature resistance from -25°C to +120°C.
Approved for contact with food. Dimensions: 270 x 340 x 1120 mm.

Squeegee 60 cm with a double rubber strip 28603-x with a super hygienic handle 130 cm 29903-x.
Width: 60 cm. The squeegee body is made of polypropylene (PP) and the rubber is NR/SBR foam rubber. Rubber is a non-staining mixture of natural and artificial rubber. This rubber is resistant to: inorganic acids and bases, water, alcohols, brake fluids (which include glycols). SBR is not resistant to: mineral oils and greases, petrol, chlorinated hydrocarbons, aliphatic and aromatic hydrocarbons. SBR rubber has conductive properties.
Approved for contact with food. Temperature resistance between -20°C and +120°C.
The handle is made from polypropylene (PP). Dimensions: 1300 x 32 mm. Temperature resistance from -25°C to +120°C. Approved for contact with food.
