

5S BOARD & CABINET LOCKOUT-TAGOUT

5S LOTO Board & Cabinet

A unique and customised organisation of LOCK-OUT procedures. These stations are designed to maximise efficiency and aim at turning your facility into a model of performance, safe and cost effective workplace.

Lockout stations and 5S Boards guarantee an aesthetic and durable means of storing tags, padlocks and LOTO devices. They can be equipped with the tools you need to isolate mechanical and electrical control points. A supplement to the existing LOTO system, LOCKOUT stations and 5S boards guarantee that LOCKOUT devices are stored properly and are easily accessible.

Shadows are a status indicator that clearly show when a LOTO device is in use. LOTO cabinets in addition to providing organisation of the existing LOTO system also guarantee, due to their temper resist structure, a safe and secure manner of storing LOTO devices.

Small LOTO Station: 5S Boards and Cabinets

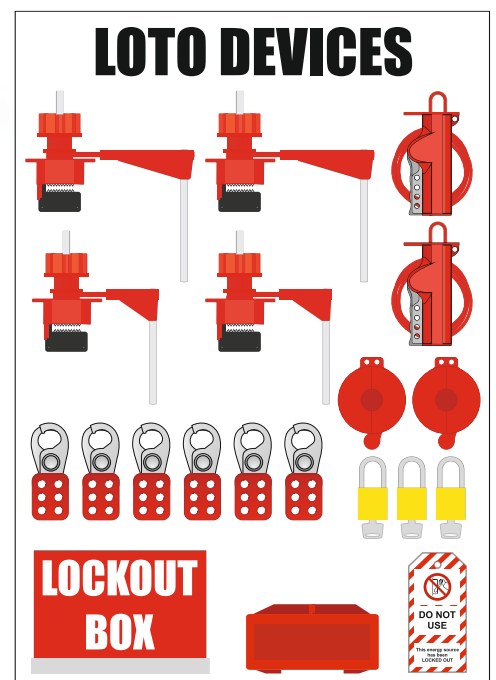

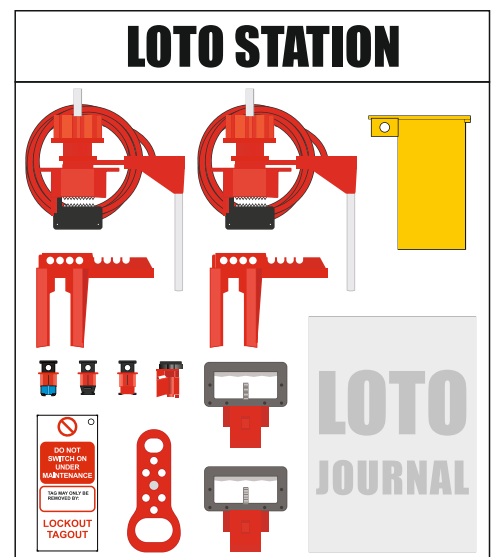

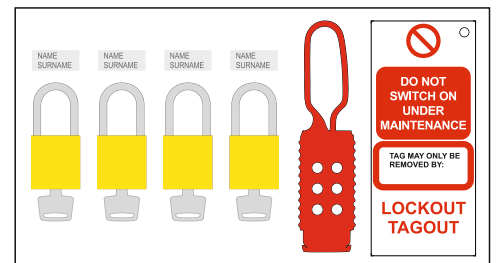

Ideal when the amount of LOTO devices to be stored is minimal. Designed to fit padlock and tags.

Standard LOTO Station: 5S Boards and Cabinets

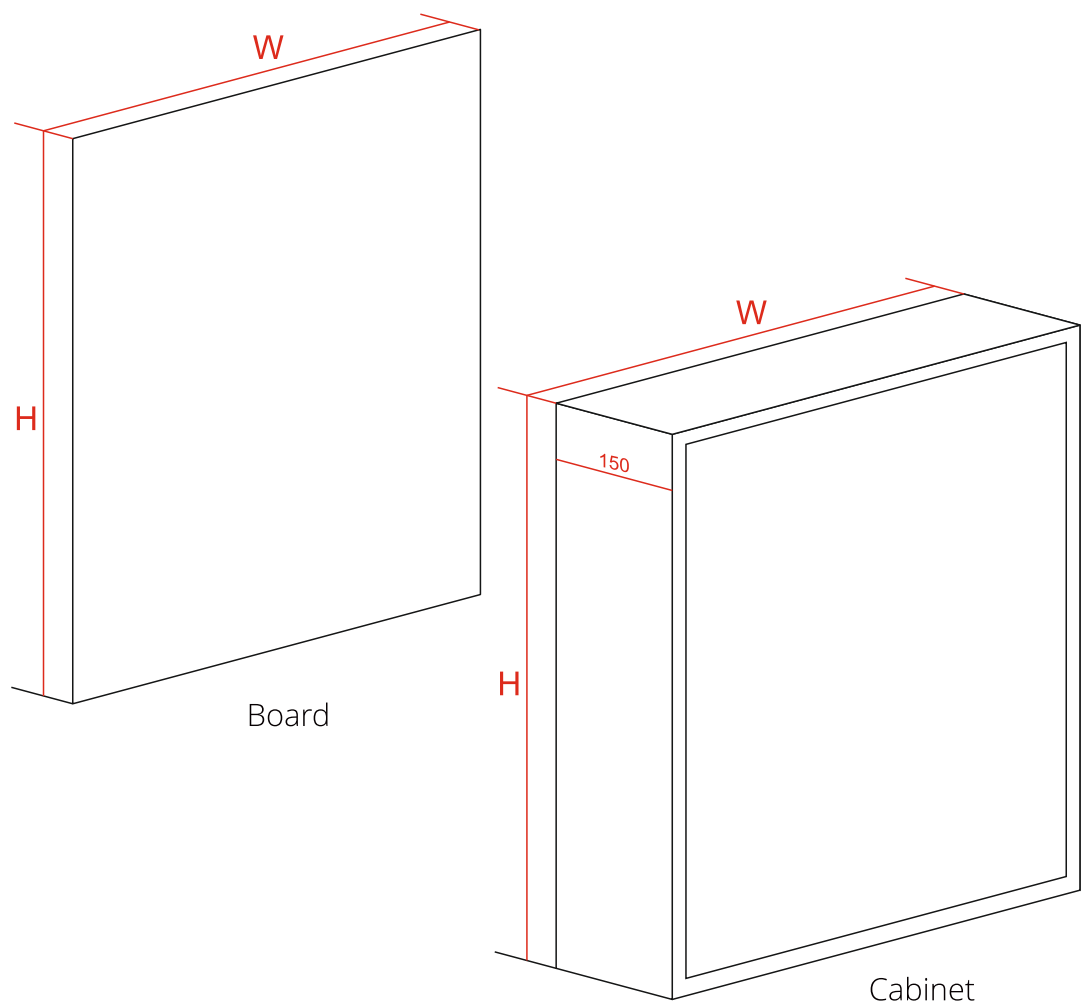

A solution best suited to be used in localised areas to keep isolation tools close to the machine that is to be locked out. Designed to fit your basic LOTO equipment.

Big LOTO Station: 5S Boards and Cabinets

Easily store and organise an extensive range of lockout devices. They offer a complete solution to the problem of how to organise and centralise LOTO systems and procedures.

LOTO Board & Cabinet

Small LOTO Station: padlocks & tags

Cat. No	Height (mm)	Width (mm)	Depth (mm)	Type of station
